

OI artist - May 2010 Joomla Template

OI artist joomla1.5 template (also rtl template) some of the features:

- The template is updated in RTL version. Change it to rtl only with one click via admin backend in Extensions- Template Manager. Select the template and click edit and select Template RTL version = yes. RTL demo
 - Flash header with different loading effects based on xml native database. If want the template the same as in our demo then if you will choose flash header only front page then you have to choose 2 modules "newsflash" and "droping". The easiest way is to install the demo version.
 - 2 style themes white and black. Check out the light version. Check out the dark version.
 - Header and footer optional fixed or scrolled. You can choose that via admin backend in Extensions - Template Manager. Select the template oi artist and click edit and make all the changes need it there.
 - Drop down and Top panel modules with cool mootools effects.
 - 2 horizontal menu options: moo dropdown menu and sucker-fish drop-down menus.
 - Three color chooser styles orange, red and blue.
 - Font size changer (increase, decrease and default size).
 - Flash News module with sliding effect loading.
 - 3 screen resolutions default, wide screen and fluid.
 - Tips. Create mouse over tips to your content and allows you to show additional information.
 - Light box. It's a great way to show images and create photo galleries.
 - Png fixed for internet explorer 6. Internet explorer 6 (IE6) warnings.
 - Demo installer included.
- An overview of OI artist key features:
